Part 2:

Foundation (SQL/Foundation)

AMENDMENT 1

TECHNICAL CORRIGENDUM 1

Introduction

1. *Rationale: Add description of new Annex.*

Insert the following point:

- 21) Annex F, ‘‘Incompatibilities with ISO/IEC 9075:1992’’, is an informative Annex. It lists incompatibilities with the previous version of ISO/IEC 9075.

3.3.2.1 Clause, Subclause, and Table relationships

1. *Rationale: Add relationship for new Annex.*

Insert the following row into Table 1 "Clause, Subclause, and Table relationships":

Clause, Subclause, or Table in this part of ISO/IEC 9075	Corresponding Clause, Subclause, or Table from another part	Part containing correspondence
Annex F, ‘‘Incompatibilities with ISO/IEC 9075:1992’’	(none)	(none)

4.1.1 Operations involving numbers

1. *Rationale: Editorial.*

Replace the 7th bullet of the 1st paragraph with:

- <width bucket function> is a function of four arguments, returning an integer between 0 (zero) and the value of the final argument plus 1 (one), by assigning the first argument to an equi-width partitioning of the range of numbers between the second and third arguments. Values outside the range between the second and third arguments are assigned to either 0 (zero) or the value of the final argument plus 1 (one).
NOTE 2 – The semantics of <width bucket function> are illustrated in Figure 1, ‘‘Illustration of WIDTH_BUCKET Semantics’’.

5.1 <token> and <separator>

1. *Rationale: Correct the BNF of <non-reserved word> and <reserved word>.*

Replace the productions for <nonreserved word> and <reserved word> with:

```

<non-reserved word> ::=
    !! All alternatives from ISO/IEC 9075-2
|  !! All alternatives from ISO/IEC 9075-5
|  EXCLUDE
|  FOLLOWING
|  NULLS
|  OTHERS
|  PRECEDING
|  TIES
|  UNBOUNDED

<reserved word> ::=
    !! All alternatives from ISO/IEC 9075-2
|  !! All alternatives from ISO/IEC 9075-5
|  CEIL | CEILING | CORR | COVAR_POP | COVAR_SAMP | CUME_DIST
|  DENSE_RANK
|  EXP
|  FILTER | FLOOR
|  LN
|  OVER
|  PARTITION | PERCENTILE_CONT | PERCENTILE_DISC | PERCENT_RANK | POWER
|  RANGE | RANK | REGR_AVGX | REGR_AVGY | REGR_COUNT | REGR_INTERCEPT
|  REGR_R2 | REGR_SLOPE | REGR_SXX | REGR_SXY | REGR_SYY | ROW_NUMBER
|  SQRT | STDDEV_POP | STDDEV_SAMP
|  VAR_POP | VAR_SAMP
|  WIDTH_BUCKET | WINDOW | WITHIN

```

6.1 <set function specification>

1. *Rationale: The definition of aggregated argument must overlay the definition in ISO/IEC 9075-2:1999 introduced by a correction elsewhere in this TC.*

Replace Syntax Rule 5) with:

- 5) Replace SR 3.1) A <value expression> *VE* simply contained in a <set function specification> *SFE* is an aggregated argument of *SFE* if either *SFE* is not an <ordered set function> or *VE* is simply contained in a <within group specification>; otherwise, *VE* is a non-aggregated argument of *SFE*.
