architecture to address font technology
advances**

Technologies de l'information — Échange d'informations sur les fontes —

Partie 1: Architecture

*AMENDEMENT 2: Améliorations mineures de l'architecture pour traiter les
avances technologiques des fontes*

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Amendment 2 to ISO/IEC 9541-1:1991 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*.

Introduction

This minor enhancement specifies additional properties of the Font Resource defined by ISO/IEC 9541-1:1991. The properties make it possible to address advances in font technology and in the increasing complexity of document processing. The properties of this Amendment are optional and in addition to those defined in ISO/IEC 9541-1:1991, with the interchange format being defined in Amendment 1 to ISO/IEC 9541-2:1991.
