

INTERNATIONAL STANDARDIZED PROFILE

ISO/IEC ISP 10607-1

First edition
1990-12-15

AMENDMENT 1
1994-04-15

Information technology — International Standardized Profiles AFTnn — File Transfer, Access and Management —

Part 1:

Specification of ACSE, Presentation and Session
Protocols for the use by FTAM

AMENDMENT 1: Additional specifications for
COBOL document types

*Technologies de l'information — Profil normalisé international AFTnn —
Transfert, accès et gestion de fichier —*

*Partie 1: Spécifications des protocoles ACSE, présentation et session pour emploi
par FTAM*

*AMENDEMENT 1: Spécifications additionnelles relatives aux types de documents
COBOL*

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental or non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. In addition to developing International Standards, ISO/IEC JTC 1 has created a Special Group on Functional Standardization for the elaboration of International Standardized Profiles.

An International Standardized Profile is an internationally agreed, harmonized document which identifies a standard or group of standards, together with options and parameters, necessary to accomplish a function or set of functions.

Draft International Standardized Profiles are circulated to national bodies for voting. Publication as an International Standardized Profile requires approval by at least 75 % of the national bodies casting a vote.

International Standardized Profile ISO/IEC ISP 10607-1/Amd.1 was prepared with the collaboration of

- Asia-Oceania Workshop (AOW);
- European Workshop for Open Systems (EWOS);
- OSI Implementors Workshop (OIW).

ISO/IEC ISP 10607 consists of the following parts, under the general title *Information technology – International Standardized Profiles AFTnn – File Transfer, Access and Management*:

- *Part 1: Specification of ACSE, Presentation and Session Protocols for the use by FTAM*
