ISO RECOMMENDATION R 1017

BENZENE EXTRACT FROM BROWN COALS AND LIGNITES
DETERMINATION OF ACETONE-SOLUBLE MATERIAL
("RESINOUS SUBSTANCES")

1st EDITION
March 1969

COPYRIGHT RESERVED

The copyright of ISO Recommendations and ISO Standards belongs to ISO Member Bodies. Reproduction of these documents, in any country, may be authorized therefore only by the national standards organization of that country, being a member of ISO.

For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations.

BRIEF HISTORY

The ISO Recommendation R 1017, *Benzene extract from brown coals and lignites – Determination of acetone-soluble material* (“Resinous substances”), was drawn up by Technical Committee ISO/TC 27, *Solid mineral fuels*, the Secretariat of which is held by the British Standards Institution (BSI).

Work on this question led, in 1966, to the adoption of a Draft ISO Recommendation.

In August 1967, this Draft ISO Recommendation (No. 1284) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies :

Australia	Italy	Switzerland
Austria	Korea, Rep. of	Turkey
Canada	Netherlands	U.A.R.
Czechoslovakia	New Zealand	United Kingdom
Denmark	Portugal	U.S.S.R.
France	Romania	Yugoslavia
India	South Africa, Rep. of	
Iran	Spain	

No Member Body opposed the approval of the Draft.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in March 1969, to accept it as an ISO RECOMMENDATION.
