COPYRIGHT RESERVED

The copyright of ISO Recommendations and ISO Standards belongs to ISO Member Bodies. Reproduction of these documents, in any country, may be authorized therefore only by the national standards organization of that country, being a member of ISO.

For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations.

BRIEF HISTORY

The ISO Recommendation R 1070, *Liquid flow measurement in open channels by slope area method*, was drawn up by Technical Committee ISO/TC 113, *Measurement of liquid flow in open channels*, the Secretariat of which is held by the Indian Standards Institution (ISI).

Work on this question led, in 1965, to the adoption of a Draft ISO Recommendation.

In January 1967, this Draft ISO Recommendation (No. 1140) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies :

Argentina	India	Romania
Australia	Ireland	Spain
Belgium	Israel	Switzerland
Canada	Italy	Thailand
France	Japan	U.A.R.
Germany	Korea, Rep. of	United Kingdom
Greece	Netherlands	

Two Member Bodies opposed the approval of the Draft :

Czechoslovakia
U.S.A.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in May 1969, to accept it as an ISO RECOMMENDATION.
