BRIEF HISTORY

The ISO Recommendation R 116, *Common Names for Pesticides - First List*, was drawn up by Technical Committee ISO/TC 81, *Common Names for Pesticides*, the Secretariat of which is held by the British Standards Institution (B.S.I.).

During its first plenary meeting, held in London, in November 1955, the Technical Committee ISO/TC 81, began its studies for this ISO Recommendation. A list of names was put forward by the Technical Committee Secretariat and those names which were acceptable to members were circulated, in April 1956, as a draft proposal.

As a result of comments received the Technical Committee Secretariat prepared a second draft proposal which was then accepted as a Draft ISO Recommendation.

On 17 July 1957, the Draft ISO Recommendation (No. 166) was distributed to all the ISO Member Bodies and was approved by the following 23 (out of a total of 39) Member Bodies:

*Australia	*Ireland	Spain
Austria	Israel	Sweden
Burma	*Italy	*Switzerland
*Canada	Japan	Union of South Africa
*Denmark	New Zealand	United Kingdom
Germany	*Norway	U.S.S.R.
*Greece	*Portugal	Yugoslavia
Hungary	Romania	

No Member Body opposed the approval of the Draft.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in August 1959, to accept it as an ISO RECOMMENDATION.

* The Member Bodies stated that they had no objection to the Draft being approved.

COMMON NAMES FOR PESTICIDES

FIRST LIST

FOREWORD

This ISO Recommendation gives the first list of common names approved by Technical Committee ISO/TC 81, *Common Names for Pesticides*, for certain pesticides of international importance. The chemical name, in conformity with the rules of the International Union of Pure and Applied Chemistry (IUPAC), is given in each case, as well as chemical formulae and notes concerning some of the names. The application of each compound is indicated in a separate column according to the following classes:

- A Insecticides or acaricides
- B Fungicides
- C Herbicides
- D Rodenticides

It is proposed in due course to issue further ISO Recommendations for approved common names. In some cases, widely used names are not available for international use at the present time, because they are protected by trade marks in certain countries.

For example, this difficulty precludes the inclusion in this list of the following names:

pp'-DDT for the chemical 1,1,1-trichloro-2,2-di-(*p*-chloro-phenyl)-ethane and

DDT for a complex chemical mixture consisting predominantly of *pp'*-DDT.
