## BRIEF HISTORY

The ISO Recommendation R 1172, *Plastics – Determination of the loss on ignition of textile glass reinforced plastics*, was drawn up by Technical Committee ISO/TC 61, *Plastics*, the Secretariat of which is held by the American National Standards Institute (ANSI).

Work on this question led to the adoption of a Draft ISO Recommendation.

In July 1968, this Draft ISO Recommendation (No. 1633) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies :

|                |                       |                |
|----------------|-----------------------|----------------|
| Austria        | Israel                | Sweden         |
| Belgium        | Italy                 | Switzerland    |
| Czechoslovakia | Japan                 | U.A.R.         |
| France         | Netherlands           | United Kingdom |
| Germany        | Poland                | U.S.A.         |
| Hungary        | Romania               | U.S.S.R.       |
| India          | South Africa, Rep. of |                |
| Iran           | Spain                 |                |

No Member Body opposed the approval of the Draft.

This Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in January 1970, to accept it as an ISO RECOMMENDATION.
