Also issued in French and Russian. Copies to be obtained through the national standards organizations.

BRIEF HISTORY

The ISO Recommendation R 1228, *Plastics – Determination of viscosity number of poly(ethylene terephthalate) in dilute solution*, was drawn up by Technical Committee ISO/TC 61, *Plastics*, the Secretariat of which is held by the American National Standards Institute (ANSI).

Work on this question led to the adoption of a Draft ISO Recommendation No. 1002, which was circulated to all the ISO Member Bodies for enquiry in July 1966 and approved by the requisite majority. In view of the comments that were submitted by some Member Bodies, however, the text of the Draft ISO Recommendation was amended from the technical point of view. A second Draft ISO Recommendation No. 1002 was then circulated to all the ISO Member Bodies for enquiry in July 1968. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies :

Austria	Israel	Sweden
Belgium	Italy	Switzerland
Brazil	Japan	U.A.R.
Czechoslovakia	Netherlands	United Kingdom
France	Poland	U.S.A.
Germany	Romania	U.S.S.R.
Hungary	South Africa, Rep. of	
Iran	Spain	

No Member Body opposed the approval of the second Draft.

This second Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided to accept it as an ISO RECOMMENDATION.
