BRIEF HISTORY

The ISO Recommendation R 124, *Determination of Total Solids of Latex*, was drawn up by Technical Committee ISO/TC 45, *Rubber*, the Secretariat of which is held by the British Standards Institution (BSI).

Work on this question by the Technical Committee began in 1948 and led, in 1955, to the adoption of a Draft ISO Recommendation.

In March 1957, this Draft ISO Recommendation (No. 145) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies:

Australia	Hungary	Romania
Austria	India	Spain
Canada	Indonesia	Sweden
Czechoslovakia	Ireland	Switzerland
Denmark	Italy	United Kingdom
Finland	Japan	U.S.A.
Germany	New Zealand	U.S.S.R.
Greece	Pakistan	

No Member Body opposed the approval of the Draft.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in August 1959, to accept it as an ISO RECOMMENDATION.

BRIEF HISTORY CONCERNING THE 2nd EDITION

With the publication of ISO Recommendation R 124, in 1959, a start was made by Secretariat of Technical Committee ISO/TC 45, *Rubber*, in revising this document in order to make it suitable for synthetic rubber latices.

Work on this question by the Working Group ISO/TC 45/WG A led, in 1962, to the adoption of a Draft Revision of ISO Recommendation R 124.

In November 1963, this Draft Revision (No. 629) was circulated in its final form to all the ISO Member Bodies for enquiry. It was approved by 27 Member Bodies. No Member Body opposed the approval of the Draft.

The Draft Revision of ISO Recommendation R 124, was then submitted by correspondence to the ISO Council which decided, in August 1966, to accept it.

The present edition (2nd edition) embodies this revision.
