The copyright of ISO Recommendations and ISO Standards belongs to ISO Member Bodies. Reproduction of these documents, in any country, may be authorized therefore only by the national standards organization of that country, being a member of ISO.

For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations.

BRIEF HISTORY

The ISO Recommendation R 1468, *Methods of test for general purpose electrical cables with aluminium or aluminium alloy conductors for aircraft*, was drawn up by Technical Committee ISO/TC 20, *Aircraft and space vehicles*, the Secretariat of which is held by the British Standards Institution (BSI).

Work on this question led to the adoption of Draft ISO Recommendation No. 1468 which was circulated to all the ISO Member Bodies for enquiry in December 1967. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies :

Belgium
Canada
Israel
Italy
Japan

Netherlands
New Zealand
Poland
Spain
Switzerland

Turkey
U.A.R.
United Kingdom

The following Member Bodies opposed the approval of the Draft :

France
U.S.S.R.

This Draft ISO Recommendation was then submitted by correspondence to the ISO Council which decided to accept it as an ISO RECOMMENDATION.

CONTENTS

	Page
1. Scope	5
I. Type tests only	5
2. Resistance to typical aircraft fluids	5
3. Ageing in air at high temperature, followed by a bend test at room temperature and an insulation test while immersed in water	6
4. Flexibility test at room temperature	7
5. Bend test at low temperature	7
6. Surface creepage test whilst immersed in salt water	8
7. Heat test	8
8. Test for emission of smoke	8
9. Test of physical properties of insulation material	9
10. Abrasion test	9
II. Type and production routine tests	9
11. Conductor resistance tests	9
12. Insulation tests	9
III. Type and production quality tests	10
13. Flammability tests	10
14. Tensile and elongation tests on conductors	10
15. Test of physical properties of insulation material	10
Annex A : Preparation of the test pieces for elongation at break test	11
Annex B : Abrasion testing machine	12
