BRIEF HISTORY

The ISO Recommendation R 2143, *Surface treatment of metals – Anodisation of aluminium and its alloys – Estimation of the loss of absorptive power by colorant drop test with prior acid treatment*, was drawn up by Technical Committee ISO/TC 79, *Light metals and their alloys*, the Secretariat of which is held by the Association Française de Normalisation (AFNOR).

Work on this question led to the adoption of Draft ISO Recommendation No. 2143, which was circulated to all the ISO Member Bodies for enquiry in October 1970. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies :

Austria	Italy	Sweden
Belgium	Japan	Switzerland
Canada	Netherlands	Thailand
Finland	New Zealand	Turkey
France	Norway	U.A.R.
Germany	Poland	United Kingdom
Hungary	Portugal	U.S.A.
India	South Africa, Rep. of	U.S.S.R.
Israel	Spain	

No Member Body opposed the approval of the Draft.

This Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided to accept it as an ISO RECOMMENDATION.
