Also issued in French and Russian. Copies to be obtained through the national standards organizations

BRIEF HISTORY

The ISO Recommendation R 283, *Full Thickness Tensile Strength and Elongation of Conveyor Belts – Specifications and Method of Test*, was drawn up by Technical Committee ISO/TC 41, *Pulleys and Belts (including Vee-Belts)*, the Secretariat of which is held by the Association Française de Normalisation (AFNOR).

Work on this question by the Technical Committee began in 1956 and led, in 1959, to the adoption of a Draft ISO Recommendation.

In March 1961, this Draft ISO Recommendation (N° 442) was circulated to all the ISO Member Bodies for enquiry. It was approved by the following Member Bodies:

Australia	France	Spain
Austria	Germany	Sweden
Belgium	Greece	Turkey
Brazil	Iran	United Kingdom
Chile	Israel	U.S.A.
Colombia	Mexico	U.S.S.R.
Czechoslovakia	New Zealand	Yugoslavia
Denmark	Portugal	

One Member Body opposed the approval of the Draft: Italy

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in November 1962, to accept it as an ISO RECOMMENDATION.
