COPYRIGHT RESERVED

The copyright of ISO Recommendations and ISO Standards belongs to ISO Member Bodies. Reproduction of these documents, in any country, may be authorized therefore only by the national standards organization of that country, being a member of ISO.

For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations.

BRIEF HISTORY

The ISO Recommendation R 345, *Shipbuilding Details—Tests on Galvanized Steel Wire for Ropes*, was drawn up by Technical Committee ISO/TC 8, *Shipbuilding Details*, the Secretariat of which is held by the Stichting Nederlands Normalisatie-instituut (NNI).

Work on this question by the Technical Committee began in 1952, taking into account the studies which had been made by the former International Federation of the National Standardizing Association (ISA), and led, in 1960, to the adoption of a Draft ISO Recommendation.

In October 1961, this Draft ISO Recommendation (No. 464) was circulated to all the ISO Member Bodies for enquiry. It was approved by the following Member Bodies:

Australia	Italy	Switzerland
Belgium	Netherlands	Turkey
Czechoslovakia	New Zealand	United Kingdom
Finland	Portugal	U.S.S.R.
France	Romania	Yugoslavia
India	Spain	

Three Member Bodies opposed the approval of the Draft:

Germany, Japan, U.S.A.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in October 1963, to accept it as an ISO RECOMMENDATION.
