DETERMINATION OF CHLORINE IN COAL BY THE BOMB-COMBUSTION METHOD

1st EDITION
December 1963

COPYRIGHT RESERVED

The copyright of ISO Recommendations and ISO Standards belongs to ISO Member Bodies. Reproduction of these documents, in any country, may be authorized therefore only by the national standards organization of that country, being a member of ISO.

For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations.

BRIEF HISTORY

The ISO Recommendation R 350, *Determination of Chlorine in Coal by the Bomb-Combustion Method*, was drawn up by Technical Committee ISO/TC 27, *Solid Mineral Fuels*, the Secretariat of which is held by the British Standards Institution (B.S.I.).

Work on this question by the Technical Committee began in 1953 and led, in 1957, to the adoption of a Draft ISO Recommendation.

In May 1958, this Draft ISO Recommendation (No. 240) was circulated to all the ISO Member Bodies for enquiry. It was approved subject to a few modifications of an editorial nature, by the following Member Bodies:

Austria	India	Portugal
Belgium	Israel	Republic
Burma	Italy	of South Africa
Chile	Japan	Romania
Czechoslovakia	Mexico	Spain
Denmark	Netherlands	United Kingdom
Germany	New Zealand	U.S.S.R.
Greece	Poland	Yugoslavia

One Member Body opposed the approval of the Draft: France.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in December 1963, to accept it as an ISO RECOMMENDATION.
