For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations

BRIEF HISTORY

The ISO Recommendation R 354, *Measurement of Absorption Coefficient in a Reverberation Room*, was drawn up by Technical Committee ISO/TC 43, *Acoustics*, the Secretariat of which is held by the British Standards Institution (B.S.I.).

Work on this question by the Technical Committee began in 1955 and led, in 1961, to the adoption of a Draft ISO Recommendation.

In November 1961, this Draft ISO Recommendation (No. 477) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies:

Australia	Germany	New Zealand
Austria	Greece	Portugal
Belgium	India	Switzerland
Brazil	Indonesia	Sweden
Denmark	Ireland	United Kingdom
Finland	Netherlands	U.S.S.R.

Three Member Bodies opposed the approval of the Draft:

France, Japan, U.S.A.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in December 1963, to accept it as an ISO Recommendation.
