BRIEF HISTORY

The ISO Recommendation R 431, *Specification for Electrolytic Copper wire Bars, Cakes, Slabs, Billets, Ingots and Ingot Bars*, was drawn up by Technical Committee ISO/TC 26, *Copper and Copper Alloys*, the Secretariat of which is held by the Deutscher Normenausschuss (DNA).

Work on this question by the Technical Committee began in 1959 and led, in 1960, to the adoption of a Draft ISO Recommendation.

In September 1962, this Draft ISO Recommendation (No. 530) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies:

Australia	Greece	Spain
Belgium	India	Sweden
Burma	Italy	Switzerland
Canada	Japan	Turkey
Chile	Netherlands	U.A.R.
Denmark	Poland	United Kingdom
Finland	Portugal	U.S.A.
France	Rep. of South Africa	U.S.S.R.
Germany	Romania	Yugoslavia

No member Body opposed the approval of the Draft.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in March 1965, to accept it as an ISO RECOMMENDATION.
