For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations.

## BRIEF HISTORY

The ISO Recommendation R 456, *Analysis of Soap. Determination of Free Caustic Alkali*, was drawn up by Technical Committee ISO/TC 91, *Surface Active Agents*, the Secretariat of which is held by the Association Française de Normalisation (AFNOR).

Work on this question by the Technical Committee began in 1961 and led, in 1962, to the adoption of a Draft ISO Recommendation.

In June 1963, this Draft ISO Recommendation (No. 584) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies:

|                |                |                |
|----------------|----------------|----------------|
| Argentina      | Hungary        | Poland         |
| Austria        | Italy          | Portugal       |
| Canada         | Japan          | Romania        |
| Chile          | Korea, Rep. of | Spain          |
| Colombia       | Morocco        | Switzerland    |
| Czechoslovakia | Netherlands    | United Kingdom |
| France         | New Zealand    | Yugoslavia     |
| Germany        | Norway         |                |

One Member Body opposed the approval of the Draft: India.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in November 1965, to accept it as an ISO RECOMMENDATION.
