ISO RECOMMENDATION R 505

TEAR PROPAGATION RESISTANCE OF THE CARCASS OF CONVEYOR BELTS (METHOD OF TEST)

1st EDITION
October 1966

COPYRIGHT RESERVED

The copyright of ISO Recommendations and ISO Standards belongs to ISO Member Bodies. Reproduction of these documents, in any country, may be authorized therefore only by the national standards organization of that country, being a member of ISO.

For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations.

BRIEF HISTORY

The ISO Recommendation R 505, *Tear Propagation Resistance of the Carcass of Conveyor Belts (Method of Test)*, was drawn up by Technical Committee ISO/TC 41, *Pulleys and Belts (including Vee-belts)*, the Secretariat of which is held by the Association Française de Normalisation (AFNOR).

Work on this question by the Technical Committee began in 1960 and led, in 1963, to the adoption of a Draft ISO Recommendation.

In December 1964, this Draft ISO Recommendation (No. 768) was circulated to all the ISO Member Bodies for enquiry. It was approved by the following Member Bodies:

Argentina	Greece	Republic of South Africa
Australia	India	Spain
Austria	Israel	Sweden
Belgium	Italy	Switzerland
Chile	Japan	Turkey
Czechoslovakia	Korea, Rep. of	U.A.R.
Denmark	Netherlands	United Kingdom
Finland	New Zealand	U.S.A.
France	Pakistan	U.S.S.R.
Germany	Portugal	Yugoslavia

No Member Body opposed the approval of the Draft.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council which decided, in October 1966, to accept it as an ISO RECOMMENDATION.
