BRIEF HISTORY

The ISO Recommendation R 616, *Determination of the Shatter Indices of Coke*, was drawn up by Technical Committee ISO/TC 27, *Solid Mineral Fuels*, the Secretariat of which is held by the British Standards Institution (BSI).

Work on this question by the Technical Committee began in 1955 and led, in 1962, to the adoption of a Draft ISO Recommendation.

In June 1963, this Draft ISO Recommendation (No. 572) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies:

Argentina	India	Spain
Australia	Iran	Switzerland
Austria	Italy	Turkey
Belgium	Netherlands	United Kingdom
Canada	New Zealand	U.S.S.R.
Chile	Poland	Yugoslavia
Czechoslovakia	Portugal	
Denmark	Romania	

Three Member Bodies opposed the approval of the Draft:

France
Germany
Republic of South Africa

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in September 1967, to accept it as an ISO RECOMMENDATION.
