The copyright of ISO Recommendations and ISO Standards belongs to ISO Member Bodies. Reproduction of these documents, in any country, may be authorized therefore only by the national standards organization of that country, being a member of ISO.

For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations.

BRIEF HISTORY

The ISO Recommendation R 632, *Methods of Test for Determining Whether an Electrode is a Deep Penetration Electrode*, was drawn up by Technical Committee ISO/TC 44, *Welding*, the Secretariat of which is held by the Association Française de Normalisation (AFNOR).

Work on this question by the Technical Committee began in 1957 and led, in 1965, to the adoption of a Draft ISO Recommendation.

In October 1965, this Draft ISO Recommendation (No. 844) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies:

Australia	India	Romania
Austria	Ireland	Spain
Belgium	Israel	Switzerland
Brazil	Italy	Sweden
Canada	Japan	U.A.R.
Chili	Netherlands	United Kingdom
Denmark	New Zealand	U.S.S.R.
France	Portugal	Yugoslavia
Germany	Republic of South Africa	

One Member Body opposed the approval of the Draft:

U.S.A.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in November 1967, to accept it as an ISO RECOMMENDATION.
