COPYRIGHT RESERVED

The copyright of ISO Recommendations and ISO Standards belongs to ISO Member Bodies. Reproduction of these documents, in any country, may be authorized therefore only by the national standards organization of that country, being a member of ISO.

For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations.

BRIEF HISTORY

The ISO Recommendation R 688, *Filler rods for braze welding—Methods of test for determining the characteristics of the deposited metal*, was drawn up by Technical Committee ISO/TC 44, *Welding*, the Secretariat of which is held by the *Association Française de Normalisation* (AFNOR).

Work on this question by the Technical Committee began in 1957 and led, in 1961, to the adoption of a Draft ISO Recommendation.

In October 1965, this Draft ISO Recommendation (No. 846) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies:

Australia	Israel	Sweden
Austria	Italy	Switzerland
Belgium	Japan	U.A.R.
Brazil	Netherlands	United Kingdom
Canada	New Zealand	U.S.S.R.
Chile	Portugal	Yugoslavia
Denmark	Romania	
France	South Africa,	
India	Rep. of	
Ireland	Spain	

Two Member Bodies opposed the approval of the Draft:

Germany
U.S.A.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in March 1968, to accept it as an ISO RECOMMENDATION.
