ISO RECOMMENDATION

R 697

SURFACE ACTIVE AGENTS

DETERMINATION OF APPARENT DENSITY
OF WASHING POWDERS BEFORE AND AFTER COMPACTION

1st EDITION
Mars 1968

COPYRIGHT RESERVED

The copyright of ISO Recommendations and ISO Standards belongs to ISO Member Bodies. Reproduction of these documents, in any country, may be authorized therefore only by the national standards organization of that country, being a member of ISO.

For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations.

BRIEF HISTORY

The ISO Recommendation R 697, *Surface active agents – Determination of apparent density of washing powders before and after compaction*, was drawn up by Technical Committee ISO/TC 91, *Surface active agents*, the Secretariat of which is held by the Association Française de Normalisation (AFNOR).

Work on this question by the Technical Committee ISO/TC 91 began in 1960 and led, in 1965, to the adoption of a Draft ISO Recommendation.

In May 1966, this Draft ISO Recommendation (No. 986) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies :

Argentina	Israel	Sweden
Austria	Italy	Switzerland
Belgium	Japan	Turkey
Brazil	Korea, Rep. of	U.A.R.
Canada	Netherlands	United Kingdom
Chile	New Zealand	U.S.S.R.
Czechoslovakia	Poland	Yugoslavia
France	Portugal	
Germany	Romania	
Greece	South Africa,	
Hungary	Rep. of	
Ireland	Spain	

No Member Body opposed the approval of the Draft.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council which decided, in March 1968, to accept it as an ISO RECOMMENDATION.
