INTERNATIONAL ORGANIZATION FOR STANDARDIZATION

ISO RECOMMENDATION R 834

FIRE RESISTANCE TESTS OF STRUCTURES

1st EDITION
September 1968

COPYRIGHT RESERVED

The copyright of ISO Recommendations and ISO Standards belongs to ISO Member Bodies. Reproduction of these documents, in any country, may be authorized therefore only by the national standards organization of that country, being a member of ISO.

For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations.

BRIEF HISTORY

The ISO Recommendation R 834, *Fire resistance tests of structures*, was drawn up by Technical Committee ISO/TC 92, *Fire tests on building materials and structures*, the Secretariat of which is held by the British Standards Institution (BSI).

Work on this question by the Technical Committee began in 1961 and led, in 1965, to the adoption of a Draft ISO Recommendation.

In December 1966, this Draft ISO Recommendation (No. 1060) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies :

Australia	Germany	Romania
Austria	Greece	South Africa, Rep. of
Belgium	Hungary	Spain
Brazil	India	Sweden
Canada	Iran	Switzerland
Chile	Israel	U.A.R.
Czechoslovakia	Japan	United Kingdom
Denmark	Korea, Rep. of	U.S.S.R.
Finland	Netherlands	
France	Poland	

One Member Body opposed the approval of the Draft :

Norway

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in September 1968, to accept it as an ISO RECOMMENDATION.

CONTENTS

	Page
1. Scope	5
2. Field of application	5
3. Apparatus	5
3.1 Furnace	5
3.2 Standard heating conditions	5
3.3 Measurement of furnace temperature	7
3.4 Tolerances for furnace temperatures	7
4. Preparation of test specimens	8
4.1 Dimensions of test specimens	8
4.2 Construction of test specimens	8
4.3 Conditioning of test specimens	8
5. Procedure	8
5.1 Conditions of test	8
5.1.1 Restraint and loading	8
5.1.2 Exposure in furnace	9
5.2 Observations during test	9
5.2.1 Stability	9
5.2.2 Integrity	9
5.2.3 Insulation	9
5.2.4 Additional observations	10
5.3 Duration of test	10
6. Expression of results	10
6.1 Fire resistance	10
6.2 Criteria of fire resistance	11
6.2.1 Stability	11
6.2.2 Integrity	11
6.2.3 Insulation	11
7. Test report	11
