For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations.

## BRIEF HISTORY

The ISO Recommendation R 932, *Animal fats – Determination of insoluble impurities*, was drawn up by Technical Committee ISO/TC 34, *Agricultural food products*, the Secretariat of which is held by the Magyar Szabványügyi Hivatal (MSZH).

Work on this question led to the adoption of a Draft ISO Recommendation.

In April 1967, this Draft ISO Recommendation (No. 1223) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies :

|                |                |                       |
|----------------|----------------|-----------------------|
| Australia      | Iraq           | Romania               |
| Bulgaria       | Ireland        | South Africa, Rep. of |
| Colombia       | Israel         | Thailand              |
| Czechoslovakia | Korea, Rep. of | Turkey                |
| France         | Netherlands    | U.A.R.                |
| Greece         | New Zealand    | United Kingdom        |
| Hungary        | Norway         | Yugoslavia            |
| India          | Poland         |                       |
| Iran           | Portugal       |                       |

No Member Body opposed the approval of the Draft.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in January 1969, to accept it as an ISO RECOMMENDATION.
