

Supplement **ITU-T A Suppl. 6 (08/2024)**

SERIES A: Organization of the work of ITU-T
Supplements to the Series A Recommendations

Guidelines for the development of a standardization gap analysis

Supplement 6 to ITU-T A-series Recommendations

Guidelines for the development of a standardization gap analysis

Summary

Supplement 6 to the ITU-T A-series Recommendations provides guidelines for ITU-T study groups to develop a standardization gap analysis based on standards developed by other ITU study groups or other standards development organizations. A standardization gap analysis may be beneficial for a study group when considering new areas of work (e.g., establishing a new Question, establishing a focus group, adding a new work item to its work programme). A focus group may also develop a standardization gap analysis.
