

Recommendation **ITU-T F.742.1 (12/2022)**

SERIES F: Non-telephone telecommunication services

Multimedia services

Requirements for smart class systems based on artificial intelligence

ITU-T F-SERIES RECOMMENDATIONS
NON-TELEPHONE TELECOMMUNICATION SERVICES

TELEGRAPH SERVICE

Operating methods for the international public telegram service	F.1–F.19
The gentex network	F.20–F.29
Message switching	F.30–F.39
The international telemesssage service	F.40–F.58
The international telex service	F.59–F.89
Statistics and publications on international telegraph services	F.90–F.99
Scheduled and leased communication services	F.100–F.104
Phototelegraph service	F.105–F.109

MOBILE SERVICE

Mobile services and multideestination satellite services	F.110–F.159
--	-------------

TELEMATIC SERVICES

Public facsimile service	F.160–F.199
Teletex service	F.200–F.299
Videotex service	F.300–F.349
General provisions for telematic services	F.350–F.399

MESSAGE HANDLING SERVICES

F.400–F.499

DIRECTORY SERVICES

F.500–F.549

DOCUMENT COMMUNICATION

Document communication	F.550–F.579
Programming communication interfaces	F.580–F.599

DATA TRANSMISSION SERVICES

F.600–F.699

MULTIMEDIA SERVICES

F.700–F.799

ISDN SERVICES

F.800–F.849

UNIVERSAL PERSONAL TELECOMMUNICATION

F.850–F.899

ACCESSIBILITY AND HUMAN FACTORS

F.900–F.999

For further details, please refer to the list of ITU-T Recommendations.

Recommendation ITU-T F.742.1

Requirements for smart class systems based on artificial intelligence

Summary

Recommendation ITU-T F.742.1 describes application scenarios and requirements for smart class system based on artificial intelligence, including application scenarios, service requirements, management requirements, and security considerations.

History

Edition	Recommendation	Approval	Study Group	Unique ID*
1.0	ITU-T F.742.1	2022-12-14	16	11.1002/1000/15184

Keywords

Artificial intelligence, education, smart class system.

FOREWORD

The International Telecommunication Union (ITU) is the United Nations specialized agency in the field of telecommunications, information and communication technologies (ICTs). The ITU Telecommunication Standardization Sector (ITU-T) is a permanent organ of ITU. ITU-T is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The World Telecommunication Standardization Assembly (WTSA), which meets every four years, establishes the topics for study by the ITU-T study groups which, in turn, produce Recommendations on these topics.

The approval of ITU-T Recommendations is covered by the procedure laid down in WTSA Resolution 1.

In some areas of information technology which fall within ITU-T's purview, the necessary standards are prepared on a collaborative basis with ISO and IEC.

NOTE

In this Recommendation, the expression "Administration" is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.

Compliance with this Recommendation is voluntary. However, the Recommendation may contain certain mandatory provisions (to ensure, e.g., interoperability or applicability) and compliance with the Recommendation is achieved when all of these mandatory provisions are met. The words "shall" or some other obligatory language such as "must" and the negative equivalents are used to express requirements. The use of such words does not suggest that compliance with the Recommendation is required of any party.

INTELLECTUAL PROPERTY RIGHTS

ITU draws attention to the possibility that the practice or implementation of this Recommendation may involve the use of a claimed Intellectual Property Right. ITU takes no position concerning the evidence, validity or applicability of claimed Intellectual Property Rights, whether asserted by ITU members or others outside of the Recommendation development process.

As of the date of approval of this Recommendation, ITU had not received notice of intellectual property, protected by patents/software copyrights, which may be required to implement this Recommendation. However, implementers are cautioned that this may not represent the latest information and are therefore strongly urged to consult the appropriate ITU-T databases available via the ITU-T website at <http://www.itu.int/ITU-T/ipr/>.
