(11/94)

GENERAL ASPECTS OF DIGITAL TRANSMISSION SYSTEMS

5-, 4-, 3- AND 2-bits SAMBPLe EMBEDDED ADAPTIVE DIFFERENTIAL PULSE CODE MODULATION (ADPCM)

ANNEX A: EXTENSIONS OF RECOMMENDATION G.727 FOR USE WITH UNIFORM-QUANTIZED INPUT AND OUTPUT

ITU-T Recommendation G.727 – Annex A

(Previously “CCITT Recommendation”)

FOREWORD

The ITU-T (Telecommunication Standardization Sector) is a permanent organ of the International Telecommunication Union (ITU). The ITU-T is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The World Telecommunication Standardization Conference (WTSC), which meets every four years, establishes the topics for study by the ITU-T Study Groups which, in their turn, produce Recommendations on these topics.

The approval of Recommendations by the Members of the ITU-T is covered by the procedure laid down in WTSC Resolution No. 1 (Helsinki, March 1-12, 1993).

ITU-T Recommendation G.727 – Annex A was prepared by ITU-T Study Group 15 (1993-1996) and was approved under the WTSC Resolution No. 1 procedure on the 1st of November 1994.

NOTE

In this Recommendation, the expression “Administration” is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.
