PREPUBLISHED RECOMMENDATION

This prepublication is an unedited version of a recently approved Recommendation. It will be replaced by the published version after editing. Therefore, there will be differences between this prepublication and the published version.

FOREWORD

The International Telecommunication Union (ITU) is the United Nations specialized agency in the field of telecommunications, information and communication technologies (ICTs). The ITU Telecommunication Standardization Sector (ITU-T) is a permanent organ of ITU. ITU-T is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The World Telecommunication Standardization Assembly (WTSA), which meets every four years, establishes the topics for study by the ITU-T study groups which, in turn, produce Recommendations on these topics.

The approval of ITU-T Recommendations is covered by the procedure laid down in WTSA Resolution 1.

In some areas of information technology which fall within ITU-T's purview, the necessary standards are prepared on a collaborative basis with ISO and IEC.

NOTE

In this Recommendation, the expression "Administration" is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.

Compliance with this Recommendation is voluntary. However, the Recommendation may contain certain mandatory provisions (to ensure, e.g., interoperability or applicability) and compliance with the Recommendation is achieved when all of these mandatory provisions are met. The words "shall" or some other obligatory language such as "must" and the negative equivalents are used to express requirements. The use of such words does not suggest that compliance with the Recommendation is required of any party.

INTELLECTUAL PROPERTY RIGHTS

ITU draws attention to the possibility that the practice or implementation of this Recommendation may involve the use of a claimed Intellectual Property Right. ITU takes no position concerning the evidence, validity or applicability of claimed Intellectual Property Rights, whether asserted by ITU members or others outside of the Recommendation development process.

As of the date of approval of this Recommendation, ITU [had/had not] received notice of intellectual property, protected by patents, which may be required to implement this Recommendation. However, implementers are cautioned that this may not represent the latest information and are therefore strongly urged to consult the TSB patent database at <http://www.itu.int/ITU-T/ipr/>.

Corrigendum 1 to Recommendation ITU-T G.798

Characteristics of optical transport network hierarchy equipment functional blocks

Corrigendum 1

Summary

Corrigendum 1 to Recommendation ITU-T G.798 (2017) contains text modifications and additions

- for consistent naming of the OMS-O to OTSiG-O and OCh-O adaptation functions,
- to correct the TSI processing in the OTSiG-O_TT_So function,
- to align with ITU-T G.872.

Corrigendum 1 to Recommendation ITU-T G.798

Characteristics of optical transport network hierarchy equipment functional blocks

Corrigendum 1

1) Scope

This corrigendum contains text modifications and additions for consistent naming of the OMS-O to OTSiG-O and OCh-O adaptation functions, to correct the TSI processing in the OTSiG-O_TT_So function and to align with ITU-T G.872.

2) Corrections to Clause 1 – Scope

Replace Figure 1-2 with the following figure:

Figure 1-2 – OTN atomic functions specific for the multi-OTU with management (MOTUm) interface

Replace Figure 1-3 with the following figure:

Figure 1-3 – OTN atomic functions specific for the non-associated overhead information

3) Modifications to Clause 2 – References

Add the following reference:

[ITU-T G.697] Recommendation ITU-T G.697 (2016), *Optical monitoring for dense wavelength division multiplexing systems*.

34) Corrections to Clause 4 – Abbreviations and acronyms

Delete the following acronyms:

~~OChr~~ — ~~OCh Optical Channel with reduced functionality~~
