

Recommendation **ITU-T K.157 (08/2024)**

SERIES K: Protection against interference

Electromagnetic compatibility requirements and test methods for satellite communication terminal equipment

Recommendation ITU-T K.157

Electromagnetic compatibility requirements and test methods for satellite communication terminal equipment

Summary

Recommendation ITU-T K.157 establishes the essential electromagnetic compatibility (EMC) requirements for satellite communication terminal equipment and ancillary accessories. This Recommendation specifies the emission and immunity requirements for satellite communication terminal equipment and ancillary equipment. It also describes test conditions for emission and immunity testing. Performance assessment and criteria for immunity tests are also specified.

History *

Edition	Recommendation	Approval	Study Group	Unique ID
1.0	ITU-T K.157	2024-08-13	5	11.1002/1000/15992

Keywords

Electromagnetic compatibility, EMC, satellite communication terminal equipment.

FOREWORD

The International Telecommunication Union (ITU) is the United Nations specialized agency in the field of telecommunications, and information and communication technologies (ICTs). The ITU Telecommunication Standardization Sector (ITU-T) is a permanent organ of ITU. ITU-T is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The World Telecommunication Standardization Assembly (WTSA), which meets every four years, establishes the topics for study by the ITU-T study groups which, in turn, produce Recommendations on these topics.

The approval of ITU-T Recommendations is covered by the procedure laid down in WTSA Resolution 1.

In some areas of information technology which fall within ITU-T's purview, the necessary standards are prepared on a collaborative basis with ISO and IEC.

NOTE

In this Recommendation, the expression "Administration" is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.

Compliance with this Recommendation is voluntary. However, the Recommendation may contain certain mandatory provisions (to ensure, e.g., interoperability or applicability) and compliance with the Recommendation is achieved when all of these mandatory provisions are met. The words "shall" or some other obligatory language such as "must" and the negative equivalents are used to express requirements. The use of such words does not suggest that compliance with the Recommendation is required of any party.

INTELLECTUAL PROPERTY RIGHTS

ITU draws attention to the possibility that the practice or implementation of this Recommendation may involve the use of a claimed Intellectual Property Right. ITU takes no position concerning the evidence, validity or applicability of claimed Intellectual Property Rights, whether asserted by ITU members or others outside of the Recommendation development process.

As of the date of approval of this Recommendation, ITU had not received notice of intellectual property, protected by patents/software copyrights, which may be required to implement this Recommendation. However, implementers are cautioned that this may not represent the latest information and are therefore strongly urged to consult the appropriate ITU-T databases available via the ITU-T website at <http://www.itu.int/ITU-T/ipr/>.
