Recommendation ITU-T K.77

Characteristics of metal oxide varistors for the protection of telecommunication installations

Corrigendum 1

Summary

Corrigendum 1 to Recommendation ITU-T K.77 corrects reference defects given in Recommendation ITU-T K.77 (2009). One reference has been withdrawn and merged with another reference. The reference and its associated text reference are changed. Other references are removed as they are not stated in the body of this Recommendation. Six references have been revised and their references are updated.
