Recommendation ITU-T Q.3942.3

Conformance test specification for the terminating identification restriction using IP multimedia core network subsystem – Part 3: User side; Test suite structure and test purposes

Summary

Recommendation ITU-T Q.3942.3v1 specifies a part 3 of the test suite structure (TSS) and test purposes (TP) for the terminating identification restriction (TIR) using IP multimedia core network subsystem; conformance test specification, applicable for the user side.

The version number, v1, indicates that this is version 1 of Recommendation ITU-T Q.3942.3 and that it relates to release 10 of the relevant 3GPP/ETSI standard.

This Recommendation contains the test specifications against requirements which are represented in Recommendation ITU-T Q.3617v1, "Terminating identification presentation and terminating identification restriction using IP multimedia core network subsystem. Protocol specification".

History

Edition	Recommendation	Approval	Study Group	Unique ID*
1.0	ITU-T Q.3942.3	2015-06-13	11	11.1002/1000/12500

Keywords

Network side, session description protocol, SDP, session initiation protocol, SIP, terminating identification presentation, terminating identification restriction, testing, TIP, TIR, TSS&TP, UE, user equipment, user side.

FOREWORD

The International Telecommunication Union (ITU) is the United Nations specialized agency in the field of telecommunications, information and communication technologies (ICTs). The ITU Telecommunication Standardization Sector (ITU-T) is a permanent organ of ITU. ITU-T is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The World Telecommunication Standardization Assembly (WTSA), which meets every four years, establishes the topics for study by the ITU-T study groups which, in turn, produce Recommendations on these topics.

The approval of ITU-T Recommendations is covered by the procedure laid down in WTSA Resolution 1.

In some areas of information technology which fall within ITU-T's purview, the necessary standards are prepared on a collaborative basis with ISO and IEC.

NOTE

In this Recommendation, the expression "Administration" is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.

Compliance with this Recommendation is voluntary. However, the Recommendation may contain certain mandatory provisions (to ensure, e.g., interoperability or applicability) and compliance with the Recommendation is achieved when all of these mandatory provisions are met. The words "shall" or some other obligatory language such as "must" and the negative equivalents are used to express requirements. The use of such words does not suggest that compliance with the Recommendation is required of any party.

INTELLECTUAL PROPERTY RIGHTS

ITU draws attention to the possibility that the practice or implementation of this Recommendation may involve the use of a claimed Intellectual Property Right. ITU takes no position concerning the evidence, validity or applicability of claimed Intellectual Property Rights, whether asserted by ITU members or others outside of the Recommendation development process.

As of the date of approval of this Recommendation, ITU had not received notice of intellectual property, protected by patents, which may be required to implement this Recommendation. However, implementers are cautioned that this may not represent the latest information and are therefore strongly urged to consult the TSB patent database at <http://www.itu.int/ITU-T/ipr/>.
