ITU-T RECOMMENDATION Q.731.1

STAGE 3 DESCRIPTION FOR NUMBERING IDENTIFICATION SUPPLEMENTARY SERVICES USING SS NO. 7: DIRECT-DIALLING-IN (DDI)

Summary

This Recommendation defines the essential functions, procedures and messages required for the transportation of direct-dialling-in information. This Recommendation has been updated due to errors in the Recommendation of 1992.

Source

ITU-T Recommendation Q.731.1 was revised by ITU-T Study Group 11 (1993-1996) and was approved under the WTSC Resolution No. 1 procedure on the 9th of July 1996.

FOREWORD

ITU (International Telecommunication Union) is the United Nations Specialized Agency in the field of telecommunications. The ITU Telecommunication Standardization Sector (ITU-T) is a permanent organ of the ITU. The ITU-T is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The World Telecommunication Standardization Conference (WTSC), which meets every four years, establishes the topics for study by the ITU-T Study Groups which, in their turn, produce Recommendations on these topics.

The approval of Recommendations by the Members of the ITU-T is covered by the procedure laid down in WTSC Resolution No. 1 (Helsinki, March 1-12, 1993).

In some areas of information technology which fall within ITU-T's purview, the necessary standards are prepared on a collaborative basis with ISO and IEC.

NOTE

In this Recommendation, the expression "Administration" is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.
