**SERIES J: TRANSMISSION OF TELEVISION, SOUND
PROGRAMME AND OTHER MULTIMEDIA SIGNALS**

Guidelines on the use of some ITU-T Recommendations in the J series

ITU-T J-series Recommendations – Supplement 5

(Previously CCITT Recommendations)

ITU-T J-SERIES RECOMMENDATIONS

TRANSMISSION OF TELEVISION, SOUND PROGRAMME AND OTHER MULTIMEDIA SIGNALS

General Recommendations	J.1–J.9
General specifications for analogue sound-programme transmission	J.10–J.19
Performance characteristics of analogue sound-programme circuits	J.20–J.29
Equipment and lines used for analogue sound-programme circuits	J.30–J.39
Digital encoders for analogue sound-programme signals	J.40–J.49
Digital transmission of sound-programme signals	J.50–J.59
Circuits for analogue television transmission	J.60–J.69
Analogue television transmission over metallic lines and interconnection with radio-relay links	J.70–J.79
Digital transmission of television signals	J.80–J.89
Ancillary digital services for television transmission	J.90–J.99
Operational requirements and methods for television transmission	J.100–J.109
Interactive systems for digital television distribution	J.110–J.129
Transport of MPEG-2 signals on packetised networks	J.130–J.139
Measurement of the quality of service	J.140–J.149
Digital television distribution through local subscriber networks	J.150–J.159

For further details, please refer to ITU-T List of Recommendations.

SUPPLEMENT 5 TO ITU-T J-SERIES RECOMMENDATIONS

GUIDELINES ON THE USE OF SOME ITU-T RECOMMENDATIONS IN THE J SERIES

Summary

This supplement gives guidance on the application of ITU-T Recommendations in the J series, in order that the reader may more readily identify those Recommendations that he should consult to obtain detailed information on the technical aspects of his specific interest.

Source

Supplement 5 to ITU-T J-series Recommendations was prepared by ITU-T Study Group 9 (1997-2000) and was approved under the WTSC Resolution No. 5 procedure on 17 September 1999.

FOREWORD

ITU (International Telecommunication Union) is the United Nations Specialized Agency in the field of telecommunications. The ITU Telecommunication Standardization Sector (ITU-T) is a permanent organ of the ITU. The ITU-T is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The World Telecommunication Standardization Conference (WTSC), which meets every four years, establishes the topics for study by the ITU-T Study Groups which, in their turn, produce Recommendations on these topics.

The approval of Recommendations by the Members of the ITU-T is covered by the procedure laid down in WTSC Resolution No. 1.

In some areas of information technology which fall within ITU-T's purview, the necessary standards are prepared on a collaborative basis with ISO and IEC.

NOTE

In this publication, the expression "Administration" is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.

INTELLECTUAL PROPERTY RIGHTS

The ITU draws attention to the possibility that the practice or implementation of this publication may involve the use of a claimed Intellectual Property Right. The ITU takes no position concerning the evidence, validity or applicability of claimed Intellectual Property Rights, whether asserted by ITU members or others outside of the publication development process.

As of the date of approval of this publication, the ITU had not received notice of intellectual property, protected by patents, which may be required to implement this publication. However, implementors are cautioned that this may not represent the latest information and are therefore strongly urged to consult the TSB patent database.

CONTENTS

	<i>Page</i>
SECTION 1 – Point-to-point transmission of digital television for contribution and primary distribution.....	1
1.1 Recommendation J.80 – Transmission of component-coded digital television signals for contribution-quality applications at bit rates near 140 Mbit/s	1
1.2 Recommendation J.81 – Transmission of component-coded digital television signals for contribution-quality applications at the third hierarchical level of ITU-T Recommendation G.702.	2
1.3 Recommendation J.82 – Transport of MPEG-2 constant bit rate television signals in B-ISDN	2
1.4 Recommendation J.85 – Digital television transmission over long distances – General principles..	2
1.5 Recommendation J.88 – Transmission of enhanced definition television signals over digital links.	2
1.6 Recommendation J.89 – Transmission mechanism for component-coded digital television signals for contribution and primary distribution applications using MPEG-2 4:2:2P@ML including all service elements for contribution and primary distribution.....	3
1.7 Recommendation J.131 – Transport of MPEG-2 signals in PDH networks	3
1.8 Recommendation J.132 – Transport of MPEG-2 signals in SDH networks	3
SECTION 2 – Secondary distribution of digital television by cable television systems and similar methods	3
2.1 Recommendation J.83 – Digital multiprogramme systems for television, sound and data services for cable distribution	3
2.2 Recommendation J.84 – Distribution of digital multiprogramme signals for television, sound and data services through SMATV networks	4
2.3 Recommendation J.87 – Use of hybrid cable television links for the secondary distribution of television into the user's premises.....	4
2.4 Recommendation J.117 – Home digital network interface specification	4
2.5 Recommendation J.150 – Operational functionalities for the delivery of digital multiprogramme television, sound and data services through multichannel, multipoint distribution systems (MMDS).....	4
SECTION 3 – Additional services supported by digital cable television systems.....	5
3.1 Recommendation J.90 – Electronic programme guides for delivery by cable television and similar methods	5
3.2 Recommendation J.94 – Service information for digital broadcasting in cable television systems ..	5
SECTION 4 – Interactive television and sound broadcasting services	6
4.1 Recommendation J.110 – Basic principles for a worldwide common family of systems for the provision of interactive television services	6
4.2 Recommendation J.111 – Network independent protocols for interactive systems	6
4.3 Recommendation J.112 – Transmission systems for interactive cable television services	7
4.4 Recommendation J.113 – Digital video broadcasting interaction channel through the PSTN/ISDN	7
4.5 Recommendation J.114 – Interaction channel using digital enhanced cordless telecommunications	7
4.6 Recommendation J.115 – Interaction channel using the global system for mobile communications	8

.....

SECTION 5 – Point-to-point digital transmission of sound programme signals	8
5.1 Recommendation J.41 – Characteristics of equipment for the coding of analogue high quality sound-programme signals for transmission on 384 kbit/s channels	8
5.2 Recommendation J.42 – Characteristics of equipment for the coding of analogue medium quality sound-programme signals for transmission on 384-kbit/s channels	9
5.3 Recommendation J.51 – General principles and user requirements for the digital transmission of high quality-sound programmes	9
5.4 Recommendation J.52 – Digital transmission of high-quality sound-programme signals using one, two or three 64 kbit/s channels per mono signal (and up to six per stereo signal)	9
5.5 Recommendation J.55 – Digital transmission of high-quality sound-programme signals on distribution circuits using 480 kbit/s (496 kbit/s) per audio channel	10
5.6 Recommendation J.57 – Transmission of digital studio quality sound signals over H1 channels	10
SECTION 6 – Measurement methods for digital cable television	10
6.1 Recommendation J.141 – Performance indicators for data services delivered over cable television systems	10
SECTION 7 – Conditional access and copy protection	11
7.1 Recommendation J.91 – Technical methods for ensuring privacy in long-distance international television transmission	11
7.2 Recommendation J.93 – Requirements for conditional access in the secondary distribution of digital television on cable television systems	11
7.3 Recommendation J.95 – Copy protection of intellectual property for content delivered on cable television systems	11
