Description Language (SDL)

Specification and Description Language implementer's guide – Version 3.0.1

This page is intentionally blank.

Summary

The purpose of this implementer's guide is to compile reported defects with resolutions and other agreed changes for the ITU-T Specification and Description Language related ITU-T Recommendations (Z.100, Z.101, Z.102, Z.103, Z.104, Z.105, Z.106, Z.107, Z.109, Z.111 and Z.119) prior to these changes being published in approved Recommendations.

This implementer's guide includes all changes agreed by Q12/17 to the texts of the relevant Recommendations consented or in-force at the date the guide is approved by SG17 and applies until either the implementer's guide is updated to following version or all the changes are incorporated into the relevant Recommendations and the implementer's guide is updated to version 3.0.2. It is assumed that consented Recommendations will subsequently be approved.

Source

SDL implementer's guide version 3.0.1 was approved on 7 September 2016 by ITU-T Study Group 17 (2013-2016)

Keywords

change requests, Closed item list, error reports, Implementer's guide, Master list of changes, Open item list, SDL-2010, Specification and Description Language.
