T.571

(09/92)

TERMINAL EQUIPMENT AND PROTOCOLS FOR TELEMATIC SERVICES

TERMINAL CHARACTERISTICS FOR THE TELEMATIC FILE TRANSFER WITHIN THE TELETEX SERVICE

Recommendation T.571

FOREWORD

The CCITT (the International Telegraph and Telephone Consultative Committee) is a permanent organ of the International Telecommunication Union (ITU). CCITT is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The Plenary Assembly of CCITT which meets every four years, establishes the topics for study and approves Recommendations prepared by its Study Groups. The approval of Recommendations by the members of CCITT between Plenary Assemblies is covered by the procedure laid down in CCITT Resolution No. 2 (Melbourne, 1988).

Recommendation T.571 was prepared by Study Group VIII and was approved under the Resolution No. 2 procedure on the 18 September 1992.

CCITT NOTE

In this Recommendation, the expression "Administration" is used for conciseness to indicate both a telecommunication administration and a recognized private operating agency.

9.1.2 Parameters used in CDS/CDC	8

INTRODUCTION

This Recommendation defines the general rules required for the implementation of the Telematic file transfer for Teletex applications.

It defines the technical mechanisms and coding used.

Note – The use of this Recommendation for Facsimile Group 4 is for further study.
