Amendment 2

ITU-T Recommendation T.90 – Amendment 2

(Previously CCITT Recommendations)

AMENDMENT 2 TO ITU-T RECOMMENDATION T.90**CHARACTERISTICS AND PROTOCOLS FOR TERMINALS
FOR TELEMATIC SERVICES IN ISDN****Summary**

Study Group 8 has agreed to propose amendments to Recommendations T.4 and T.30 to include the optional use of the modulation system defined in Recommendation V.34. Amendment 2 to Recommendation T.90 covers the addition of a Telematics Profile Identifier to distinguish the use of the procedures in Annex C/T.30, in the analogue mode with the V.34 full-duplex mode from its use in the digital mode in the ISDN environment.

Amendment 2 to ITU-T Recommendation T.90, was prepared by ITU-T Study Group 8 (1993-1996) and was approved under the WTSC Resolution N° 1 procedure on the 3rd of July 1996.

FOREWORD

ITU (International Telecommunication Union) is the United Nations Specialized Agency in the field of telecommunications. The ITU Telecommunication Standardization Sector (ITU-T) is a permanent organ of the ITU. Some 179 member countries, 84 telecom operating entities, 145 scientific and industrial organizations and 38 international organizations participate in ITU-T which is the body which sets world telecommunications standards (Recommendations).

The approval of Recommendations by the Members of ITU-T is covered by the procedure laid down in WTSC Resolution No. 1 (Helsinki, 1993). In addition, the World Telecommunication Standardization Conference (WTSC), which meets every four years, approves Recommendations submitted to it and establishes the study programme for the following period.

In some areas of information technology which fall within ITU-T's purview, the necessary standards are prepared on a collaborative basis with ISO and IEC.

NOTE

In this Recommendation, the expression "Administration" is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.
