ANNOUNCEMENT

NOTIFICATION OF RESCISSION

The JEDEC Solid State Technology Association (JEDEC) announces the rescission of the following JEDEC Standard:

**JESD53 Management of Component Obsolescence by Government Contractors,
published January 1996.**

This standard was approved for rescission by the JEDEC Board of Directors at their August, 2002 Board Meeting under Board Ballot JCB-02-71 as recommended by the JEDEC JC-13.2 Subcommittee. The reason for the rescission is that JESD53 has been replaced by EIA Engineering Bulletin, GEB1, Diminishing Manufacturing Sources and Material Shortages (DISMISS) Management Practices. It is noted that DOD adopted GEB1 on December 14, 2000.

#

JEDEC is the leading developer of standards for the solid-state industry, they have published over 800 documents to date. Almost 1800 representatives, appointed by some 250 **JEDEC** member companies work together in 50 **JEDEC** committees to meet the needs of every segment of the industry, manufacturers and consumers alike. The Standards, Publications, and Outlines that they generate are accepted throughout the world. All **JEDEC** documents are available online, at no charge. To access **JEDEC** documents or obtain further information, visit the **JEDEC** web page, at www.jedec.org.

JEDEC is a sector of the Electronic Industries Alliance (EIA).
