Foreword

This translation has been made based on the Amendment to the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently, **JIS A 5423**:2004 is partially replaced with this Amendment.

Date of Establishment: 1976-05-01

Date of Revision: 2007-10-20

Date of Public Notice in Official Gazette: 2007-10-22

Decorated cement shingles for dwelling roofs (Amendment 1)

JIS A 5423:2004 is revised as follows.

4.2 Characteristics of cement shingles for roofs

In table 3, replace the headword “incombustibility” with “incombustibility or heat generation property” and in the box below the headword, change the contents to “Incombustibility Class 1 or heat generation property Class 1”.

6.1 Test piece

Add the following to the lower end of table 6:

Heat generation property test piece	Height 50 or under One side 99 ± 1	According to Annex A (normative)
--	---	-------------------------------------

6.11 Incombustibility test

Replace with the following:

“6.11 Incombustibility test or heat generation test The incombustibility test or heat generation test shall be performed selecting either one of the following methods.

- a) Incombustibility test in **JIS A 1321**
- b) Heat generation test in Annex A”

8 Marking

Add the following **f)** under **e)**, and replace the sentence “However, items **d)** and **e)** may be marked with some suitable method like an invoice and so on.” with “However, items **d)**, **e)** and **f)** may be marked with some suitable method like an invoice and so on”:

- f) Type and result of incombustibility test or heat generation test.

Annex 1 (informative)

In the column (I) (Requirements in **JIS**), add “Type and result of incombustibility test or heat generation test” to the contents of clause **8** (Marking).

Add the following Annex A (normative) before Annex 1:
