JAPANESE INDUSTRIAL STANDARD

J I S

Standard Form of Specifications
for Bush Cutters

B 9221-1987

1. Scope

This Japanese Industrial Standard specifies the standard form of the specifications and its entry gist for the bush cutters equipped with engine ⁽¹⁾, hereinafter referred to as the "bush cutters".

Note ⁽¹⁾ The bush cutters stated in this Standard means the bush cutters for hand work use, which are equipped with rotating mowing blade and are used for mowing weeds and the like in agricultural and forestry industry chiefly.

Remark: The units given in { } in this Standard are in accordance with the conventional units and are appended for informative reference.

2. Form of Specifications

The form of specifications shall be as follows:

- (1) The form of specifications shall be in accordance with Attached Table. This Attached Table gives the outline of the dimensions and performance of bush cutters.
- (2) The entry items can be selected adequately according to the object and be appended with the structure of each part, materials, etc. as required.
- (3) Append a drawing like the whole body drawing and gives the outline and main dimensions of the external form, engine, handle, part equipped with the saw, etc.

3. Entry Gist of Specifications

The entry gist of specifications shall be as follows:

- (1) Brand, Type and Class Enter the brand marked on bush cutter, type symbol of bush cutter and its class (shouldering, carrying on the back, and the like).

Applicable Standards:

JIS B 8031-Spark Plugs for Internal Combustion Engines

JIS B 9212-Bush Cutter Saws
