C 2336 : 1999

Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of International Trade and Industry through deliberations at the Japanese Industrial Standards Committee in accordance with the Industrial Standardization Law. Consequently **JIS C 2336 : 1991** is replaced with **JIS C 2336 : 1999**.

In this revision, conformance with the corresponding International Standard **IEC 60454-3-1**, *Pressure-sensitive adhesive tapes for electrical purposes—Part 3 : Specifications for individual materials—Sheet 1 : PVC film tapes with pressure-sensitive adhesive* was taken into consideration.

Date of Establishment: 1954-05-22

Date of Revision: 1999-07-20

Date of Public Notice in Official Gazette: 1999-07-21

Investigated by: Japanese Industrial Standards Committee
Divisional Council on Electricity

Pressure-sensitive adhesive polyvinyl chloride tapes for electrical purposes

Introduction This Japanese Industrial Standard has been prepared based on IEC 60454-3-1, *Pressure-sensitive adhesive tapes for electrical purposes—Part 3 : Specifications for individual materials—Sheet 1 : PVC film tapes with pressure-sensitive adhesive* published in 1998 as the second edition, however the provisions (for classification, designation and class A performance) which are not specified in the corresponding International Standard are added.

1 Scope This Japanese Industrial Standard specifies pressure-sensitive adhesive polyvinyl chloride tapes for electrical purposes (hereafter referred to as “tapes”).

Remarks : The International Standard corresponding to this Standard is given below.

IEC 60454-3-1 : 1998 *Pressure-sensitive adhesive tapes for electrical purposes—Part 3 : Specifications for individual materials—Sheet 1 : PVC film tapes with pressure-sensitive adhesive*

2 Normative references The following standards contain provisions which, through reference in this Standard, constitute provisions of this Standard. If the indication of the year of coming into effect (or the year of issue) is given to these referred standards, only the edition of indicated year constitutes the provision of this Standard, but the revision and amendment made thereafter are not applied. The normative references without the indication of the year of coming into effect (or the year of issue) shall apply limiting only to the most recent edition (including the amendment).

JIS C 2107 *Methods of test for pressure-sensitive adhesive tapes for electrical purposes*

IEC 60426 : 1973 *Test methods for determining electrolytic corrosion with insulating materials*

Informative reference : The IEC Standard number is based on the new numbering system of IEC Standards put in force in January 1st 1997, and the Standards published before the said date are renumbered by adding 60000 to the former number. This is only the change in number and the contents remain unchanged.

3 Definitions

- a) **pressure-sensitive adhesive tapes** Tapes whose one side is coated with an adhesive which maintain adhesiveness permanently at room temperature. They are adhered on various types of different surfaces by making them in contact with the surface then slightly pressurizing them so that the activation by means of water, solvent or heat is not required.

4 Classification and designation Classification and designation of tapes shall be as stated below.
