Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee, as the result of proposal for revision of Japanese Industrial Standard submitted by Japan Office & Institutional Furniture Association (JOIFA)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14. Consequently **JIS S 1016 : 1995** is replaced with this Standard.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.

Fixed desk and chair for lecture room

1 Scope This Japanese Industrial Standard specifies the fixed desk and chair for lecture room (hereafter referred to as “desk and chair”) to be used in universities, colleges and the like.

Remarks : The said desk and chair mean the desk and chair for two persons or more.

2 Normative references The standard as shown in attached table 1 contain provisions which, through reference in this Standard, constitute provisions of this Standard. The most recent editions (including amendments) of the standards shall be applied.

3 Definitions For the purposes of this Standard, the following definitions apply:

- a) **top board** the member constituting a working plane used for writing and the like
- b) **seating plane** the member constituting the plane made to support the force acting vertically for support of human body
- c) **shelf board** the member constituting a board shape for the purpose of storing stationery and the like
- d) **edge surface of seating side of top board** the edge surface of seating side of top board facing the person seated.

4 Dimensions The dimensions of desk and chair shall be in accordance with **JIS S 1015** or the agreement between the parties concerned with delivery.

5 Classification The classification of desk and chair shall be in accordance with clause 2 of **JIS S 1015**.

6 Quality

6.1 Appearance The appearance shall be as follows:

- a) The appearance shall be well finished and be free from noticeable defects such as flaws, warps, the disconnection at jointing part.
- b) The part coming into contact with the human body and clothes shall be free from sharp protrusions, corners, fine splits.
- c) The face side of painted surface shall be uniform in gloss and colour tone, and be free from uneven painting, sagging, etc.

6.2 Performance The performance, when tested as specified in clause 9, shall conform to the specifications in table 1.
