	Page
Introduction	1
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Classification for base metal type of post heat treated part	1
5 Type of post heat treatment	2
6 Thickness in post heat treatment	2
6.1 Thickness used for determining heating rate and cooling rate	2
6.2 Thickness used for determining holding time of heat treatment and effective heated width	2
7 Temperature of post heat treatment and holding time	2
8 Heating rate and cooling rate of post heat treatment	3
9 Post heat treatment method	4
9.1 Post heat treatment method by heating in furnace	4
9.2 Post heat treatment method by local heating	4
10 Record	5

Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the results of proposal for revision of Japanese Industrial Standard submitted by The Japan Welding Engineering Society (JWES) / Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently **JIS Z 3700** : 1987 is replaced with this Standard.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.
