1. Purpose

This rule is purposed to smoothen option informaiton establishment and application.

2. Scope of Application

This rule applies to option information establishment and application.

3. Meaning of Terminology

(1) Option information

This is what option composition is established without model establishment to correspond to optional diversification.

(2) Option composition

This is the composition which shows combination between option parts as conformed to MSC establishment.

(3) MSC

These are initials of model specification code which shows model code added by option code according to combination of option parts.

(4) Option code

This is what option parts are classified by type and by option and codified.

(5) Option information table

This is the table which shows clearly each applicable grade for type and option of option part in unit of option base.

(6) Usage condition

This means to limite the applicable range of option part with option base, model spec. code, option code, and classification.

(7) Classification code

This means what option parts are classified by type and codified.

4. Managing Division of the Rule

Engineering managing room is in charge of managing this rule.

5. Procedure for Revision and Abolishion.

Engineering management room head takes charge of revision and abolishion of this rule by conferring with related divisions.

6. Option Information Establishment and Application Method

Option information establishment and application method shall be made as shown in below.

(1) On establishment of new model or derived model, passanger/commercial developement room shall establish model option planning and at same time prepare option information table to report to engineering management room. (using option information table in Attached Table 2)

(2) Engineering management room shall check option information table and record option code and classification code in, to notify of them to production planning department and other related divisions.

(3) Production planning department shall specify the combination of applicable option parts, namely, MSC standard on basis of option information table by conferring with such related division as sale management dep. and others, and prepare option composition establishment/revision notice chart table to notify engineering management room.

engineering management room inputs option composition into data base. (Using option composition establishment/revision notice table in attached table 3)

(4) When revision is made on option information, passanger/commercial development room shall modify option information to notify engineering management room.

Engineering management room shall check revised option information table to notify such related divisions as production planning dep. and others. production planning fep. shall make revision on MSC standard and prepare option composition establishment/tevision notice table to notify engineering management room, which inputs revised option composition into data base.

(5) On establishment of new model or derived model, engineering management room shall do coding of usage condition as to each option part on basis of option information table to input it into data base. When revision is made on usage condition by reason of engineering change, engineering management room shall notify revised usage condition along with revision notice to related divisions. (Using usage condition establishment/revision Notice table in Attached Table 4)

Appendix

This Rule is effective from the date of establishment and revision.
