1. Scope of Application

This standard determines the import inspection for stearic acid calcium, which is used for a subsidiary of manufacturing coated sand of our company.

2. Inspection Items and Inspection Method

The inspection items and inspection method are as table 1.

Table 1

Inspection items	Inspection method	Remarks
External appearance	Coefficient adjustment one time sampling inspection	Special inspection standard S – 2, AQL : 1.0
Weight	“	“
Melting point	Checking method	
Mesh	“	
Water contained	“	

3. Inspection Lot

Consider the all products of one time delivery as 1 inspection lot.

4. Method of Sample Picking

(1) External Appearance, Weight

Follow the simple random sampling method of KS A 3151(Random sampling method) from a lot.

(2) Melting Point, Mesh, Water Contained

After sampling 10% of lumps of the sample by the simple random sampling method of KS A 3151 from a lot, divide them as the total sample amount to be 200g and pick up the sample and mix it well.

Here, quantity of the sampled containers shall be more than 2 EA.

5. Test and Inspection

(1) External Appearance
