NIOEC SP

NIOEC SPECIFICATION FOR ELECTRICAL COMPONENTS OF PACKAGE UNITS

FIRST EDITION

JULY, 2005

THIS SPECIFICATION IS THE PROPERTY OF NATIONAL IRANIAN OIL ENGINEERING & CONSTRUCTION COMPANY. IT IS CONFIDENTIAL AND ALL RIGHTS RESERVED TO THE OWNER. NEITHER WHOLE NOR ANY PART OF THIS DOCUMENT MAY BE DISCLOSED TO ANY THIRD PARTY, REPRODUCED, STORED IN ANY RETRIEVAL SYSTEM OR TRANSMITTED IN ANY FORM OR BY ANY MEANS WITHOUT THE PRIOR WRITTEN CONSENT OF THE NATIONAL IRANIAN OIL ENGINEERING & CONSTRUCTION COMPANY.

IN THE NAME OF GOD**FOREWORD**

By their very nature, technical standard specifications are continuously subject to modifications and revisions. To strengthen their merit and usefulness, continuous improvements, addendum, deletion of disparate information and consequently provision of updated revisions are to be made in order to ascertain that such standard specifications meet the current requirements, inclusive of Iranian Petroleum Standards (IPS) and the recognized and acceptable national and international standards, as well as the optimal codes and practices based on the accumulated in-house know-how and plant knowledge and experiences.

However, in reality, due to several reasons, not to mention the complexity of the matter, the ultimate goal of continuous direct embedment of the required changes on the relevant standard specifications may be far reaching. Therefore, in the interim periods between the officially issued revisions, the required changes will appear in other documents related to the engineering and design work of the on going projects.

In response to the initiative of the Design Division of the Engineering and Construction Directorate, and considering that the task of the execution of several important and mega projects for the realization of the new oil refineries, pipelines and oil terminals as well as improvements of the existing facilities, has been assigned to NIOEC, it was decided to update the NIOEC Specifications and to issue new official revisions.

The Design Division of the Engineering and Construction Directorate was itself entrusted to carry out this important task, and as such by forming several special technical committees, working in close co-operation and cohesion and sharing their expertise and knowledge, the updated and revised NIOEC Specifications were successfully prepared and complied.

These Specifications are intended to be used for Oil Refineries, Distribution Depots, Oil Terminals, Pipelines and Pump Stations within NIOEC's projects, and have been proven to be of high value for such purposes. It must however be appreciated that these Specifications represent the minimum requirements and should in no way be interpreted as a restriction on the use of better procedures, engineering and design practices or materials.

We encourage and highly appreciate the users and other clear sighted and experts to send their comments on the Specifications to the Design Deputy of the Engineering and Construction Director of NIOEC for evaluation and consideration.

S. R. KASAEIZADEH

EXECUTIVE DIRECTOR

NOTES:

- 1) THIS SHEET IS A RECORD OF ALL REVISIONS TO THIS SPECIFICATION.
- 2) REMARKS RELATED TO EACH REVISION SHOW A BRIEF DESCRIPTION. THESE REMARKS SHALL BE INTERPRETED IN CONJUNCTION WITH THE REVISED TEXT MARKED BY REVISION NUMBERS.
- 3) WHEN APPROVED EACH REVISION SHALL BE CONSIDERED AS A PART OF THE ORIGINAL DOCUMENT.
- 4) NUMBER OF PAGES EXCLUDES THIS SHEET AND THE COVER SHEET.

1.0 SCOPE

This Specification covers the general technical requirements for the design, fabrication, assembly and installation of electrical equipment, and materials on skid-mounted or package units.

2.0 REFERENCES

Throughout this Specification the following dated or undated standards/codes are referred to. These referenced standards shall, to the extent specified herein, form a part of this Specification. For undated reference, the latest edition of referenced document (including any supplement or amendments) applies. For dated references, the edition cited applies. The applicability of changes in dated references that occur after the cited date, shall mutually be agreed upon by NIOEC and VENDOR/CONTRACTOR.

API (AMERICAN PETROLEUM STANDARD)

API PR 505	Recommended Practice for Classification of Locations for Electrical Installations at Petroleum Facilities Classified as Class1,Zone 0,Zone 1,Zone 2
API PR 540	Electrical Installations in Petroleum Processing Plants

IEC (INTERNATIONAL ELECTROTECHNICAL COMMISSION)

IEC 60079-7	Electrical Apparatus for Explosive Gas Atmospheres part7: Increased Safety "E"
IEC 60423	Conduits for Electrical Purposes- Outside Diameters of Conduits for Electrical Installations and Threads for Conduits and Fittings
IEC 60529	Degrees of Protection Provided by Enclosures (IP Codes)
IEC 60947-2	Low-Voltage Switchgear and Control gear : part 2 Circuit-Breakers
IEC 60947-4-1	Low-Voltage Switchgear and Control gear : part 4-1 Contactors and Motor-Starters

NIOEC-SP (NIOEC SPECIFICATIONS)

[NIOEC-SP-00-10](#) NIOEC Specification for units

3.0 UNITS

International system of units (SI) shall be used in accordance with [NIOEC-SP-00-10](#), unless otherwise specified.

4.0 STANDARDS AND CODES

4.1 The electrical equipment shall be in compliance with the latest edition of the relevant IEC publications.
