ADDITION TO POINTCARE TOOL BAG SPECIFICATION

This is to accompany the Pointcare Tool bag specification. The following alterations must be adhered to during the manufacture of the Pointcare Tool bag:

Dimensionally the bag is to be 640 x 240 x 240 mm

- 2 The metal insert in the lower portion is to be aluminium.
3. The carrying handles are to have rope inserts to provide extra strength.
4. The hinged tray for the small tools is to carry elasticated straps in place of the pockets fitted to the prototype.
5. The foam insert in the lid is to be modified for ease of access to hydraulic gauge.
6. An additional A4 sized document wallet is to be fitted to the rear portion of the hinged tray.
7. The vinyl cover in the lid must be re-designed so that the 3 strips of self-adhesive velcro are replaced with a more durable fastening; one that will withstand environmental conditions such as rain. The existing velcro strips peel off when wet. Possible solution; riveted safety studs.

All the above are detailed in the Point Care Tool Bag Specification, a copy of which is enclosed.
