OVERHEAD LINE CAMPAIGN CHANGES – DATA SHEET

71	BALANCE WEIGHT ANCHOR GUIDE TUBE SUPPORTS

COMPONENT	Balance weight anchor guide tube supports, as shown on 1/074/203
PROBLEM	Under certain conditions, the balance weights come into contact with the square corners of the guide tube top angle support (component drawing 1/171/226) causing them to foul. The affected support brackets are shown on 1/171/226 revision 0 and have square corners compared with the revised bracket shown on 1/171/226 revision 2 that has the corners cut off.
ACTION REQUIRED	Replace with current OLEMI styles to assembly 1/074/203 and component 1/171/226. These have a revised design of guide tube support bracket with the corners cut off. In addition these have a larger tube size (48mm instead of 42mm) to allow for extra long movement of weights. Note that this campaign change was originally issued as a construction site instruction and is reflected on current OLEMI drawings.

Reference Information	
Ellipse standard job number	13071
Ellipse standard job description	Install new design of guide tube support bracket (171/226)
Category	Tube fittings
Priority	No
Types of OLE affected	Mk3b
Original equipment dates	1990
