MODEL CLAUSES FOR CIVIL ENGINEERING WORKS

SECTION 175

PROTECTIVE COATING OF CONCRETE AND MASONRY SURFACES

NOTES TO SPECIFIER:

These notes do not form part of the Specification.

Existing coatings

175.1

The specifier should check that the process specified for removing any existing coatings is suitable for the surface and coatings.

When the total removal of the existing coatings is not required, it is essential that sample flakes of the existing coatings, taken back to the substrate, are taken and analysed to check the compatibility of the existing and new coatings.
