SECTION 202

ROAD PAVEMENTS

Pavement construction permitted options

202.001 Road pavements shall be constructed from one of the permitted options described in Appendix 202/1.

Horizontal alignments, surface levels and surface regularity of pavement courses

202.002 Horizontal alignments, surface levels and surface regularity of pavement courses shall be in accordance with the Specification for Highway Works, clause 702, with the following amendments:

Delete “Appendix 1/12” and substitute “setting out information as shown on the Contract Drawings”.

Delete “Appendix 7/1” and substitute “Appendix 202/1”.

The vertical profile, crossfall and pavement course thicknesses shown on the Contract Drawings shall be used to determine the design levels of pavement courses.

The grid for checking surface levels of pavement courses shall be as shown on the Contract Drawings.

The permitted surface irregularities shall be in accordance with Category B Roads as defined in the Specification for Highway Works, table 7/2.

General requirements for sub-base and base

202.003 Sub-bases and bases shall be in accordance with the Specification for Highway Works, clauses 801 and 810, with the following amendment:

Delete “Appendix 7/1” and substitute “Appendix 202/1”.

Excavation, trimming and reinstatement of existing surfaces

202.004 Existing surfaces shall be excavated, trimmed and reinstated in accordance with the Specification for Highway Works, clause 706, with the following amendments:

Delete “Appendix 7/2” and substitute “the Contract Drawings”.

Delete “Appendix 2/3” and substitute “the Contract Drawings”.

Backfilling of excavations shall be in accordance with Section 51: Excavations.
