MODEL CLAUSES FOR CIVIL ENGINEERING WORKS

SECTION 203

KERBS, FOOTWAYS AND PAVED AREAS

NOTES TO SPECIFIER:

These notes do not form part of the Specification.

Kerbs, footways and paved areas generally	203.1	<i>Only the specification relating to those types of paving used in a particular contract should be included.</i>
Precast concrete flags	203.2	<i>The Contract Drawings should show the bond and the finished levels and crossfall.</i>
Flexible surfacing	203.3	<i>A separate table should be completed for each different location and type of flexible surfacing construction. The Contract Drawings should describe the finished levels and crossfall.</i>
In situ concrete	203.4	<i>A separate table should be completed for each different location and grade of concrete. The Contract Drawings should describe the finished levels and crossfall.</i>
Concrete block paving	203.5	<i>A separate table should be completed for each location and different type of block paving. The Contract Drawings should describe the finished levels and crossfall. In addition, details at edges, chamber covers, gullies and other openings should also be shown.</i>
Clay pavers	203.6	<i>A separate table should be completed for each different location and type of block paving. The Contract Drawings should describe the finished levels and crossfall. In addition, details at edges, chamber covers, gullies and other openings should also be shown.</i>
Grass concrete paving	203.7	<i>On Table 203/5, the Specifier shall delete one type as appropriate.</i> <i>A separate table should be completed for each different location and type of grass concrete paving. The Contract Drawings should describe the finished levels and crossfall.</i>
